7"

Model: M3D-EME07

3D Photos & Videos

The Emersa™ Series tablet takes standard side-by-side content and converts it on the fly to no-glasses 3D. Show all your photos and videos from virtually any 3D camera on this glasses-free 3D "picture frame" and adjust the amount of 3D to suit your own personal preference. Support is included for .avi and .mp4 stereoscopic videos and you can even work with the Magnetic 3D team to convert your 2D content to 3D.

3D Games

Enjoy hours of entertainment with over 100 games that are already pre-loaded and enabled for 3D without glasses. Our new glasses-free 3D tablet includes popular titles like Samurai II, Iron Wars, and Chain3D. Have a favorite game that is not included? Just let us know and our engineers will work on enabling it for you. Are you a developer? A standard glasses-free 3D API/SDK is coming soon...
